ACKNOWLEDGEMENTS

This report was prepared with the support of the State Water Resources Control Board SWAT Program staff and particularly with the support of the Regional Water Quality Control Board SWAT Program staff who supplied the information necessary for this report.

I. EXECUTIVE SUMMARY

Executive Summary

A total of 114 of the 150 Rank 1 Solid Waste Assessment Test (SWAT)¹ reports have been submitted. Of these, 39 reports have been reviewed and accepted as meeting the requirements of the law, 41 reports have been reviewed and returned to the site operators for additional information, and 34 are under review by the staffs of the nine California Regional Water Quality Control Boards (Regional Boards). SWAT report submittals for an additional seven sites were waived because other existing information indicated that hazardous waste was migrating into the water [per Subsection 13273(c)]. The applicability of the SWAT program to 12 sites is questionable and has yet to be resolved. The remaining 17 SWAT reports are still under preparation by the site operators.

Of the 39 accepted SWAT reports, only one site is known to be leaking wastes at concentrations which classify the waste as a hazardous waste. An additional 31 sites are leaking wastes at concentrations which exceed background levels in the surrounding ground and/or surface water, but are below concentrations which classify the wastes as hazardous. Of the 32 landfills at which leakage has been detected, five landfills have caused some degradation or pollution in domestic or municipal water supply wells. In all cases, further investigations and remedial actions are being required.

Well substantiated conclusions cannot be reached at this point due to the paucity of data. However, a general trend can be inferred. The 46 accepted or waived reports can be divided into two categories: (1) 18 reports from hazardous waste or co-disposal sites and (2) 28 reports from Class III landfills. It appears that hazardous waste leakage will occur more often from the Category 1 sites. Leakage from the Category 2 (Class III landfills) sites generally is not at a high enough concentration to classify the discharge as a hazardous waste.

¹ All acronyms in this report are contained in Appendix VII.

II. PROGRAM IMPLEMENTATION

Overview

This report, prepared pursuant to Government Code Section 66796.54, describes the current status of the water quality portion of the SWAT program. The body of the SWAT requirements are contained in Section 13273 of the Water Code (see Appendix IV for the complete text). This law requires the State Water Resources Control Board (State Board) to rank all solid waste disposal sites throughout the State on the basis of the potential threat they may pose to water quality. Further, each site is tested to determine whether there is hazardous waste leakage from the site.

Each solid waste disposal site operator is required to submit a SWAT report to the appropriate Regional Board. The SWAT reports are due the first day of July of each year, depending on their ranking, with Rank 1 sites due July 1, 1987.

Subsection 13273(b) requires that the SWAT report contain:

1. An analysis of the surface and ground water on, under, and within one mile of a solid waste disposal site to provide a reliable indication of whether there is any leakage of hazardous waste; and
2. A chemical characterization of the soil-pore liquid in those areas which are likely to be affected if the solid waste disposal site is leaking, as compared to geologically similar areas near the solid waste disposal site which have not been affected by leakage.

Water Code Subsection 13273(b) further requires that a qualified professional certify that the report contains all of the information required above. This certification must be made by a Registered Geologist, Certified Engineering Geologist, or Registered Civil Engineer who has had at least five years experience in ground water hydrology.

This report addresses only the Rank 1 sites. The successive ranks will be addressed in future reports to the Legislature due on January 1, 1990 and January 1, 1991. In addition, discussion of Rank 1 sites whose reports were not approved by September 30, 1988 will be included in the future reports.

Ranked List

Subsection 13273(a) requires that the State Board rank all solid waste disposal sites based upon the threat which they may pose to water quality. A list of approximately 2,100 sites was compiled from the following sources:

1. California Waste Management Board (CWMB)
2. County Solid Waste Management Plans
3. Department of Health Services Reports (DOHS)
4. Regional Board and State Board files

The State Board approved the initial ranked list of active and inactive solid waste disposal sites in December 1985. Revised rankings were adopted by the State Board in October and December 1986 and December 1987. The most recently approved list contains over 2,200 sites, consisting of 14 ranks of 150 sites each, and a 15th partially filled rank. Appendix V contains the Ranked List of Solid Waste Disposal Sites which was adopted by the State Board on December 17, 1987.

Technical Guidance Manual

A draft guidance document for the SWAT report was distributed in March 1986 and revised in October 1986. A final document (Technical Guidance Manual--Solid Waste Water Quality Assessment Test (SWAT)--Proposals and Reports) was completed in August 1988. Rank 1 site operators referred to the draft guidance documents during the preparation of their SWAT reports.

Notification of SWAT Obligations and Request for Proposals

Most Rank 1 site operators were notified of their requirement to submit a SWAT report between February and May 1986. Since some sites had little or no monitoring points installed prior to the SWAT program, each site operator was requested to submit a proposal so that Regional Board staff could review the adequacy of the proposed monitoring network.

The SWAT guidance document recommended that the proposal include site characterization work sufficient to reach a conclusion as to the adequacy of its monitoring network. Unfortunately, however, many operators did not do so. As a result, some monitoring networks were not recognized as inadequate until submission of the SWAT report. In such cases, the report was returned to the operator for revision.

Report Review

SWAT reports are reviewed by Regional Board staff. Several reports were also reviewed by State Board staff to ensure quality control. Based on the these reviews, the State Board has determined that the reports are sufficiently accurate to determine whether or not the sites are leaking hazardous wastes.

III. CURRENT PROGRAM STATUS OF RANK 1 SITES

Status Summary

The status of the 150 Rank 1 SWAT reports as of September 30, 1988 is as follows:

- o One-hundred-fourteen reports submitted:

Thirty-nine reports reviewed and accepted as meeting requirements.

Forty-one reports returned to the operators for revisions and/or additions.

Thirty-four reports under review or pending review by the Regional Boards.

- o Seven reports waived (sites known to be leaking hazardous waste).
- o Twelve sites which may not be subject to Section 13273.
- o Seventeen reports not yet submitted.

Table I displays the report status broken down by Regional Board (including field office where applicable) and Figure 1 displays the relative percentage of sites in each category on a statewide basis. Figure 2 displays the locations for Rank 1 sites.

Reports Accepted:

Thirty-nine reports have been reviewed and accepted as meeting program requirements. The review process consists of determining whether the number, location, and design of the wells and the soil testing could detect any leachate buildup, leachate migration, or hazardous waste migration. The review process also includes determining whether the sampling and chemical analyses are sufficient to detect hazardous waste migration.

Reports Returned:

The operators of 41 sites are currently gathering additional information as requested by the Regional Boards. In the majority of these cases, additional sample data are required to verify the results of the initial sampling. In addition, some reports do not meet the minimum requirements of a SWAT report as set forth in Subsection 13273(b). It should be noted that initially 61 reports were returned to the operator for submittal of additional information, and that 20 reports have been resubmitted and are either under review or have been accepted. Of the 41 currently returned reports, 24 are expected to be resubmitted by the end of 1988 and the remaining 17 are expected to be submitted in 1989.

Reports Under Review:

Thirty-four reports are in the review process by Regional Board staff. Ideally, all 150 Rank 1 reports should have been submitted by July 1, 1987 and reviewed by July 1, 1988. However, many reports were submitted late and 61 reports were returned to the operator for additional information, thus prolonging the Regional Board review process. Twenty-nine reports are expected to be reviewed by the end of calendar year 1988 and the remaining five will be reviewed in 1989.

Waived Reports:

If a Regional Board determines that a SWAT report is not necessary because other information demonstrates that hazardous wastes are migrating into the water, the Regional Board may waive the requirement to submit a SWAT report [Subsection 13273(c)]. The Regional Boards have waived the report requirements for seven Rank 1 sites. Table II contains information on sites for which the SWAT report submittal has been waived. The operators or owners of sites for which SWAT reports were waived are conducting remedial actions.

Not Subject to Section 13273:

After the 1985 ranked list was approved, the applicability of Section 13273 for 12 sites has been questioned. This matter is under review and should be resolved shortly.

Late Reports:

Seventeen reports have not been submitted. Only 56 reports were submitted on or before the July 1, 1987 due date. During the following one year period (July 1, 1987 through June 30, 1988), an additional 50 reports were submitted. Eight reports were submitted between July 1, 1988 and September 30, 1988.

Enforcement action² was initiated against 16 site operators. Eight Administrative Civil Liabilities (ACLs) were issued to Rank 1 operators for late reports. Of these eight, seven operators ultimately submitted reports. Total fines from the eight ACLs amounted to approximately \$50,000. In addition to the ACLs, enforcement action included three Cease & Desist Orders (which threatened ACL action), three Notices of Violations, and two referrals to the Attorney General. Further information on

2 Enforcement action is generally pursued under Water Code Section 13268 which provides for Administrative Civil Liability for any person failing or refusing to furnish technical or monitoring program reports (in this case, SWAT reports) as required by Subsection 13267.

enforcement action may be found in Appendix II. Table III contains information on the 17 sites for which the SWAT report is still late. Five of the sites are operated by the U.S. Navy, five by other public agencies, and seven by private industry. Table IV contains the anticipated submittal dates for the late reports.

Program Evaluation

Section 13273 was added to the Water Code in 1984. Originally, the operators of the first rank of solid waste disposal sites were required to submit a SWAT report to the Regional Boards by January 1, 1987. However, a legislative amendment in 1986 changed the due date to July 1, 1987. Of the 150 Rank 1 sites, 123 sites are regulated by the Regional Boards through Waste Discharge Requirements (WDRs). The remaining 27 sites do not have WDRs (See Table V). Only a small percentage of the Rank 1 sites had a monitoring system in place which would comply with the SWAT requirements. As a result, most site operators had to conduct a site characterization investigation and install monitoring points in a relatively short period of time. Because the legislation was new, many site operators were unsure as to what exactly was required in a SWAT report.

In March 1986, the State Board prepared a draft guidance document for the SWAT program which was disseminated to the Rank 1 site operators by way of the Regional Board offices. Many operators had questions about the draft document and did not begin their SWAT investigation immediately. The draft document recommended four quarters of sample data, thus site operators of sites without adequate monitoring had to hire a consultant, perform a site characterization, install new monitoring wells, and collect samples over a one year period. Therefore, it is not surprising that many reports were submitted late.

Feedback from the site operators and/or their consultants has revealed that the approximate average cost of a SWAT investigation and report is \$100,000. While this amount may be small compared to the annual budget of large, active landfills, it generally creates a financial burden to operators or owners of small, active landfills and is a serious burden to operators or owners of closed landfills. Additionally, many publicly owned and privately owned landfills depend on a waste disposal rate structure established by a governmental agency. These facts contributed to delays in approving a budget to perform the necessary report. Table VI shows the distribution of Rank 1 sites with regard to site activity and site size.

Occasionally, Regional Board staff has been unable to locate the site operator. Water Code Section 13273.3, added in 1987,

redefined the term "operator". As a result, if the entity that originally operated the site no longer exists or is unable to comply with the SWAT legislation, the Regional Board may order any person who owns or has owned the solid waste disposal site to prepare the SWAT report. Thus, it should be possible to locate a responsible party for every SWAT site. Because this amendment was not effective until September 1987, and because some operators of Rank 1 sites were no longer in business, the Regional Boards could not identify a responsible party for many sites prior to that date. As a result, responsible parties for some sites were not notified of their SWAT obligations until late 1987.

Twenty Rank 1 SWAT sites are federal installations which, being operated and/or owned by the federal government, are exempt from ACL fines. Generally, the sites at federal installations are behind schedule. The Regional Boards find it much more difficult to compel them to meet deadlines.

Future Progress

A majority of the remaining Rank 1 SWAT reports will be reviewed during Fiscal Year (FY) 1988-89. Some reports will not be submitted until late 1989, therefore, their review will be in FY 1989-90. The operators of five solid waste disposal sites have yet to indicate when their SWAT report will be completed.

IV. SUMMARY OF SWAT REPORT DATA

SWAT report reviews can be divided into two steps as detailed in Subsections 13273 (d) and (e):

"(d) The regional board shall examine the report submitted pursuant to subdivision (b) and determine whether the number, location, and design of the wells and the soiling (sic) testing could detect any leachate buildup, leachate migration, or hazardous waste migration. If the regional board determines that the monitoring program could detect the leachate and hazardous waste, the regional board shall take the action specified in subdivision (e). If the regional board determines that the monitoring program was inadequate, the regional board shall require the solid waste disposal site to correct the monitoring program and resubmit the solid waste assessment test based upon the results from the corrected monitoring program.

(e) The regional board shall examine the approved solid waste assessment test report and determine whether any hazardous waste migrated into the water. If the regional board determines that hazardous waste has migrated into the water, it shall notify the State Department of Health Services and the California Waste Management Board and shall take appropriate action pursuant to Chapter 5 (commencing with Section 13300)."

Determination of Adequate Monitoring Network

For the purpose of SWAT report reviews, the monitoring network is subdivided into three categories: surface water monitoring, ground water monitoring, and vadose zone monitoring.

Surface water monitoring generally consists of taking grab samples from water bodies within a one-mile radius of the landfill. In many cases, there is no surface water within one mile of the landfill and surface water monitoring is not performed.

Ground water monitoring consists of installing monitoring wells adjacent to the landfill or leachate wells in the landfill and retrieving fluid samples on a quarterly basis. Nearby water extraction wells may also be included in the monitoring network, but their data may be questionable due to uncertain drilling practices or construction standards.

Vadose zone monitoring generally consists of installing devices capable of extracting soil moisture in the vadose zone (i.e., the zone above the water table and below the ground surface). The most commonly accepted monitoring device is a lysimeter. If

a properly sited landfill leaks, the preferred location to detect leakage is in the vadose zone before the contaminants reach the water table. Vadose zone monitoring should be considered the "front line of defense" in leak detection. Some landfills (particularly those around the San Francisco Bay or others near sea level) have little to no vadose zone because the water table is very near the ground surface; Regional Boards have waived the requirement for vadose zone monitoring in these cases.

Of the 114 SWAT reports that have been submitted, two sites were determined to have a totally inadequate monitoring network. Both reports have been returned to the operator with the request that additional monitoring points be added and the SWAT report resubmitted. Six sites were determined to have a partially inadequate network and their reports were returned or are still under review. Thirty-six sites were determined to have a partially adequate monitoring network; seven of these reports were ultimately approved. Forty-eight sites were determined to have a totally adequate network; thirty-two of these reports were ultimately approved. The adequacy of the monitoring network of the remaining 22 sites is still undetermined; eighteen of these reports are still under review and four have been returned to the operator. Table VII displays the distribution of adequate versus inadequate monitoring networks for the 114 submitted SWAT reports.

Determination of Hazardous Waste Migration

Leaking Sites

As explained in Appendix III, State Board staff has classified leaking sites into two categories based on the definition of hazardous waste.

1. Hazardous Waste Leakage:

The following eight sites (with names of nearest major city and county) are known to be leaking hazardous wastes (including the seven waived³ sites).

FORT ORD LANDFILL

(Fort Ord, Monterey County)

OPERATING INDUSTRIES LANDFILL

(City of Monterey Park, Los Angeles County)

EL DORADO LANDFILL INCORPORATED--UNION MINE LANDFILL

(City of El Dorado, El Dorado County)

U.S. AIR FORCE--MCCLELLAN AFB LANDFILL

(City of Sacramento, Sacramento County)

OWENS LAKE SULFATE SLURRY IMPOUNDMENT

(City of Keeler, Inyo County)

MCCOLL SITE

(City of Fullerton, Orange County)

ORANGE COUNTY--COYOTE CANYON LANDFILL

(City of Newport Beach, Orange County)

STATE OF CALIFORNIA--STRINGFELLOW QUARRY

(City of Glen Avon, Riverside County)

In general, these sites are leaking high concentrations of volatile organic compounds such as vinyl chloride, dichloroethelene, trichloroethelene, and occasional benzenes. Some sites are leaking high concentrations of metals. Action is being taken at all eight sites to protect the quality of the water. Additional information on each site may be found in Appendix I.

3 The definition of a waived site may be found on Page 6.

2. Non-hazardous waste leakage:

The following 31 sites have been determined to be leaking wastes in this category.

CITY GARBAGE COMPANY OF EUREKA LANDFILL
(City of Eureka, Humboldt County)
MENDOCINO COUNTY--CASPAR LANDFILL
(City of Caspar, Mendocino County)
SONOMA COUNTY--HEALDSBURG LANDFILL
(City of Healdsburg, Sonoma County)
IT CORPORATION--VINE HILL FACILITY
(City of Martinez, Contra Costa County)
RICHMOND SANITARY SERVICE--WEST CONTRA COSTA LANDFILL
(City of Richmond, Contra Costa County)
STAUFFER CHEMICAL--MARTINEZ
(City of Martinez, Contra Costa County)
BFI--NEWBY ISLAND LANDFILL
(City of San Jose, Santa Clara County)
JONES--HAMILTON
(City of Newark, Santa Clara County)
IT CORPORATION--PANOCHÉ
(City of Benicia, Solano County)
MARINA LANDFILL
(City of Marina, Monterey County)
JOHN SMITH LANDFILL
(City of Hollister, San Benito County)
CASMALIA RESOURCES DISPOSAL SITE
(City of Casmalia, Santa Barbara County)
OXNARD CITY--SANTA CLARA COASTAL LANDFILL
(City of Oxnard, Ventura County)
VENTURA RSD--BAILARD LANDFILL
(City of Oxnard, Ventura County)
FRESNO CITY LANDFILL
(City of Fresno, Fresno County)
KERN COUNTY--MCFARLAND-DELANO LANDFILL
(City of Delano, Kern County)
KINGS COUNTY--HANFORD CITY LANDFILL (OLD)
(City of Hanford, Kings County)
TULARE COUNTY--VISALIA LANDFILL
(City of Visalia, Tulare County)
TULARE COUNTY--WOODLAKE LANDFILL
(City of Woodlake, Tulare County)
REDDING CITY LANDFILL
(City of Redding, Shasta County)
TEHAMA COUNTY--RED BLUFF LANDFILL
(City of Red Bluff, Tehama County)
OAKLAND SCAVENGER--ALTAMONT PASS LANDFILL
(City of Livermore, Alameda County)
AMADOR COUNTY--BUENA VISTA LANDFILL
(City of Ione, Amador County)

GBF LANDFILL--CONTRA COSTA WASTE SERVICE
(City of Antioch, Contra Costa County)
AEROJET LIQUID ROCKET COMPANY
(City of Sacramento, Sacramento County)
SACRAMENTO CITY LANDFILL
(City of Sacramento, Sacramento County)
IT CORPORATION--MONTEZUMA HILLS FACILITY
(City of Rio Vista, Solano County)
BONZI SANITARY LANDFILL
(City of Modesto, Stanislaus County)
STANISLAUS COUNTY--GEER ROAD LANDFILL
(City of Modesto, Stanislaus County)
YOLO COUNTY--CENTRAL LANDFILL
(City of Davis, Yolo County)
IT CORPORATION--IMPERIAL VALLEY FACILITY--MORTON SALT
LANDFILL
(City of Westmoreland, Imperial County)

In general, the leakage may be typified as the same volatile organic compounds discussed in Category 1 but at lower concentrations. However, some leakage may be typified as simply increased concentrations of general minerals such as chlorides. Continued monitoring or actually clean up is occurring at these sites. Additional information on each site may be found in Appendix I.

Non-leaking Sites

The following seven sites have been determined to not be leaking.

- SONOMA COUNTY--CENTRAL LANDFILL
(City of Santa Rosa, Sonoma County)
- SANTA CRUZ CITY LANDFILL
(City of Santa Cruz, Santa Cruz County)
- AZUSA LAND RECLAMATION COMPANY
(City of Azusa, Los Angeles County)
- VENTURA RSD--COASTAL LANDFILL
(City of Oxnard, Ventura County)
- PACKWAY MATERIALS LANDFILL
(City of Hat Creek, Shasta County)
- SAN BERNARDINO COUNTY--BIG BEAR LANDFILL
(City of Big Bear, San Bernardino County)
- CHEVRON USA--HUNTINGTON BEACH LEASE "A" SITE
(City of Huntington Beach, Orange County)

Six of the seven sites are currently under WDRs. Continued monitoring is occurring at these sites.

V. REMEDIAL ACTION FOR LEAKING LANDFILLS

Remedial action for leaking landfills generally consists of issuing a Board Order and ultimately revising the WDRs. It should be noted that recent legislation (AB 2448 and AB 3071--1988) created a fund which is to be used by operators of Class III landfills for closure of landfills and remedial action. The fund also provides monies for the regulatory review of closure plans. Resources for the fund are generated by assessments from operators of Class III landfills.

Cease & Desist Order

If a site is leaking, the Regional Board usually issues a Cease & Desist Order which requires the site operator to submit a report that defines the vertical and lateral extent of the release [per Water Code Subsection 13267 (a)]. After review of the initial report, a revised Cease & Desist Order may be issued which requires that the operator implement appropriate remedial actions. Interim measures to stop the release are usually part of the initial action.

Cleanup & Abatement Order

In the case of a leaking landfill that does not have current WDRs, the Regional Board may issue a Cleanup & Abatement Order. The procedures that are followed are similar to those described above for Cease & Desist Orders.

Revision of Current Waste Discharge Requirements

Subsection 13273(f) requires that when a Regional Board revises the WDR for a solid waste disposal site, the Regional Board must consider the information provided in the SWAT report and any other relevant site-specific engineering data provided by the site operator for that solid waste disposal site as part of a report of waste discharge. As stated earlier (and displayed in Table V), 123 sites are regulated under WDRs while the remaining 27 sites have no WDRs. Of the 46 reviewed or waived reports, 39 reports were from sites with current WDRs and 7 reports were from sites without WDRs.

Among other things, WDR revision consists of incorporating the additional monitoring points installed for the SWAT investigation into the monitoring network. In some cases, the frequency of sampling the monitoring points has increased or analysis of additional waste constituents has been required.

Actual Cleanup

Table VIII displays the distribution of the 46 sites with respect to type of leak and remedial actions. The degree with which

cleanup is pursued is dependent on the beneficial uses of the surrounding waters and the magnitude of contamination. In areas where beneficial uses are substantial, remedial action can ultimately involve cleanup as a part of the closure requirements for the landfill and/or installation of pollutant interception facilities and removal of contaminated water.

The State Board and Regional Boards will be prioritizing the identified leaking landfills and, in the short-term, have redirected from core regulatory landfill activities to address the most critical situations.

Most of the landfills discussed in this report were not known to be leaking until review of the SWAT report. Additional drilling and sampling to determine the extent of contamination and to propose a corrective action plan is necessary at many of these sites prior to initiating final site cleanup. During this further investigation, interim clean up measures will be implemented if appropriate.

Lastly, Section 66799 of the California Government Code establishes an assistance and direct clean up program administered by the CWMB. This program is intended to provide for loan guarantees to assist willing responsible parties to finance investigations and remedial measures. Additionally, a fund is established to allow the State to perform remedial measures if there is not a financially able responsible party.

VI. INTER-AGENCY COORDINATION

Subsection 13273(e) requires the Regional Board to notify DOHS and CWMB if the Regional Board determines that hazardous waste has migrated into the water. Both agencies have been notified regarding the status of the seven waived sites and one additional site that is leaking hazardous wastes. Usually the Regional Boards will also notify the other agencies if any type of leakage is discovered.

A Memorandum of Understanding (MOU) is being prepared by staff from the three boards in the Environmental Affairs Agency (specifically: Air Resources Board, State Water Resources Control Board, and California Waste Management Board). The MOU will address several points:

1. Coordinated response to assessment reports.
2. Coordinated approach to remedial actions.
3. Anticipating and managing the results of the program.
4. Implementation of notice requirements.
5. Sharing of data.

VII. LEGISLATIVE ASPECTS

It was apparent in 1987 that the resources allotted to this program were inadequate to accomplish all the required work. The Regional Boards redirected resources from lower priority programs to the SWAT program to avoid the development of a SWAT program backlog. Two budget change proposals (BCPs) were prepared in 1987. One would add 9.0 PYs to provide a portion of the resources required to eliminate the funding shortfall identified earlier. The other BCP added 0.8 PY for the review of Exemption Request Questionnaires. Both BCPs were included in the approved FY 1988-89 budget. A \$2.6 million reduction in general funds for FY 1988-89 was imposed on the State Board however, and it was necessary to defer filling any of these new positions until April 1, 1989. Consideration is being given to legislative remedies, but probably not before the legislative session in 1990.

VIII. CONCLUSIONS

As stated earlier, 32 of the 39 accepted SWAT reports indicate that the landfill is leaking. (See Figure 3 for relative percentages of sites in each leak category.) Because Subsection 13273(a) required the State Board to rank the landfills based upon their threat to water quality, many sites that were suspected to be leaking were placed in Rank 1. Thus, it is expected that the Rank 1 SWAT reports will contain a higher percentage of "leakers" than the reports from Ranks 2 through 15.

The SWAT program is one which is intended to identify landfills which may be adversely impacting the quality of State waters. The nature of information in an approvable SWAT report is insufficient to quantify these potential impacts. However, data gathered as part of follow-up investigations on the extent of migration of detected leakage and its effect on beneficial uses of State waters will provide the data necessary to quantify the impact on the quality of State waters. Our future reports will include this quantification as it becomes available from follow-up investigations.

Five landfills have caused some degradation or pollution in domestic or municipal water supply wells. For the most part, the spread of leaking contaminants in the ground water from the 32 leaking landfills has not been fully defined, and investigations at most sites are ongoing. Interim corrective actions are being implemented at some sites as are permanent remedies at sites where the full extent of the leakage has been defined. The purpose of these actions is to minimize or preclude impacts to beneficial uses.

Ten of the 32 leaking landfills are impacting beneficial uses of surface waters, primarily marine habitat. Only two of these sites are located near inland streams where leakage is degrading municipal, industrial or agricultural supplies. The magnitude of these surface water impacts are not yet assessed, but are generally assumed to be minimal due to a dilution factor and the small volume of leaking wastes.

Any conclusions based on only 46 sites (39 accepted SWAT reports and 7 waived reports) are very tenuous. Also, since the 46 sites are quite different in terms of age, size, nature of waste received, ownership, and regulatory history, it is difficult to draw any overall conclusions. However, for the purposes of this report, the 46 sites will be divided into two categories and certain overall conclusions made for each category. Table VIII displays the distribution of the 46 sites, and Figure 4 displays the relative percentage of sites in each category.

The first category consists of 18 sites which were established to accept hazardous waste. Some of these sites accepted only a small volume of non-hazardous solid waste while others were specifically designed to co-dispose non-hazardous solid waste with hazardous waste. Military sites are included in this category since the military historically used their sites for co-disposal. Only 1 of the 18 sites in this category was found not to be leaking. Additionally, 6 of the 18 sites found to be leaking were leaking hazardous wastes. Another interesting note is that six of the seven sites which had their SWAT reports waived due to previously detected hazardous waste leakage are in this category.

Based on the above, the following generalized conclusions can be inferred:

1. If sites which contain large quantities of hazardous waste leak, the leakage will probably be hazardous in nature.
2. Sites which co-dispose hazardous wastes with non-hazardous wastes appear to have a high probability of leakage.

The second category consists of 28 sites which are landfills receiving municipal solid waste and are commonly referred to as Class III landfills. These are the facilities which make up the largest number of SWAT sites: probably a much larger percentage than the 61 percent within the 46 sites being discussed. Only 2 of the 28 sites were determined to be leaking hazardous waste. However, an additional 16 sites are leaking wastes at concentrations above drinking water action levels. Thus, it may be possible that these 16 sites are also leaking hazardous wastes, but their concentrations may be diluted below hazardous waste levels by the time the constituents are detected at monitoring points. It is the intent of the State and Regional Boards to categorize these sites by age, size, location (urban versus agricultural waste streams), siting characteristics, presence of liners and leachate collection systems, or any other category in order to reach conclusions regarding why certain sites leak and others do not leak.

Class III landfills are not designed to be leakproof. Instead, the regulation of these landfills is based on two important premises: first, that they contain only very minute quantities of hazardous waste (specifically household hazardous wastes) and second, that any leakage would not cause impairment of beneficial uses of ground or surface waters. Nevertheless, the presence of hazardous substances in monitoring points can be attributed to one or more of the following four factors:

1. The volume of household hazardous wastes in Class III landfills is larger than originally assumed or the mobility of these wastes is greater than predicted.
2. The disposal of hazardous wastes in sanitary landfills prior to the time when disposal of hazardous wastes were regulated is greater than predicted.
3. The illegal disposal of hazardous waste (i.e., non-household hazardous waste) has occurred or is occurring at the Class III landfills.
4. Volatile constituents emanating from the landfill in the gaseous phase may redissolve into the water outside of the landfill perimeter.

APPENDIX I

**SWAT Report Summaries for All Rank 1 Reports
That Have Been Approved or Waived**

SOLID WASTE ASSESSMENT TEST (SWAT) REPORT SUMMARY

GENERAL DATA

=====

SITE NAME: CITY GARBAGE COMPANY OF EUREKA LANDFILL RANK: 1
REGION: 1 INITIALS OF REGIONAL BOARD CONTACT: TD
DATE REPORT RECEIVED BY REGIONAL BOARD: 07/01/87
DATE REPORT APPROVED BY REGIONAL BOARD: 01/19/88
REPORT STATUS: APPROVED

DATA SUBMITTED

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
NUMBER OF BACKGROUND SAMPLE LOCATIONS:	0	1	0
NUMBER OF DOWN-GRADIENT SAMPLE LOCATIONS:	1	8	0
TOTAL SAMPLE LOCATIONS:	1	9	0
NUMBER OF SAMPLING EVENTS:	1	9	0
BLANK = UNDETERMINED			

FINDINGS REGARDING WATER CODE SUBSECTIONS 13273(d) & (e)

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
MONITORING NETWORK FOUND ADEQUATE:	Y	Y	W
DOES THE SITE LEAK?	N	Y	Y
HAZARDOUS WASTE:	N	N	N
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	N	Y	Y
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

Recent disposal cells fitted with clay liners & leachate removal. Will put clay cap on old cells that are up to grade.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

=====

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:
Hazardous wastes not received; just municipal wastes and household hazardous wastes.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES MAY HAVE ON THE WATERS OF THE STATE:

Wastes are degrading ground water quality adjacent to site with low level volatile organics and general minerals. Operator is drilling more wells and conducting more sampling to determine extent of degradation and corrective action plan.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

=====

UNSATURATED ZONE MONITORING WAIVED. GROUNDWATER IS 10 FEET BELOW GROUND SURFACE AT TOE OF SITE. WDR'S WERE REVISED MAY 25, 1988 REQUIRING CLAY LINERS, LEACHATE REMOVAL AND CLAY CAPS.

SOLID WASTE ASSESSMENT TEST (SWAT) REPORT SUMMARY

REPORT STATUS: APPROVED

DATA SUBMITTED

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
NUMBER OF BACKGROUND SAMPLE LOCATIONS:	0	1	0
NUMBER OF DOWN-GRADIENT SAMPLE LOCATIONS:	1	7	0
TOTAL SAMPLE LOCATIONS:	1	8	0
NUMBER OF SAMPLING EVENTS:	3	8	0
BLANK = UNDETERMINED			

FINDINGS REGARDING WATER CODE SUBSECTIONS 13273(d) & (e)

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
MONITORING NETWORK FOUND ADEQUATE:	Y	Y	W
DOES THE SITE LEAK?	N	N	N
HAZARDOUS WASTE:	N	N	N
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	N	N	N
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

Leachate collection and recycle facilities and two down gradient impervious barriers are in place.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:

Hazardous wastes are not accepted at the site and liquids are not accepted at the site. Results of comprehensive analyses of sample (2) of full strength leachate indicate no hazardous material.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES MAY HAVE ON THE WATERS OF THE STATE:

NO LEAK;, HENCE, NO EFFECT ON WATERS OF THE STATE.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

OPERATOR CURRENTLY CONDUCTING ADDITIONAL HYDROGEOLOGIC WORK PURSUANT TO SUBCHAPTER 15.

SOLID WASTE ASSESSMENT TEST (SWAT) REPORT SUMMARY

GENERAL DATA

SITE NAME: SONOMA COUNTY-HEALDSBURG LANDFILL

RANK: 1

REGION: 1

INITIALS OF REGIONAL BOARD CONTACT: CG

DATE REPORT RECEIVED BY REGIONAL BOARD: 06/29/87

DATE REPORT APPROVED BY REGIONAL BOARD: 07/24/87

REPORT STATUS: APPROVED

DATA SUBMITTED

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
NUMBER OF BACKGROUND SAMPLE LOCATIONS:	0	0	0
NUMBER OF DOWN-GRADIENT SAMPLE LOCATIONS:	0	6	4
TOTAL SAMPLE LOCATIONS:	0	6	4
NUMBER OF SAMPLING EVENTS:	0	0	1
BLANK = UNDETERMINED			

FINDINGS REGARDING WATER CODE SUBSECTIONS 13273(d) & (e)

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
MONITORING NETWORK FOUND ADEQUATE:	N	Y	Y
DOES THE SITE LEAK?	U	N	Y
HAZARDOUS WASTE:	N	N	N
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	N	N	Y
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

CORRECT NONFUNCTIONING LYSIMETERS AND CONDUCT ADDITIONAL VADOSE ZONE MONITORING. CONTINUE TO MONITOR WELLS FOR PRESENCE OF GROUNDWATER.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:
HAZARDOUS WASTES NOT ACCEPTED; ONLY MUNICIPAL WASTES.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES

MAY HAVE ON THE WATERS OF THE STATE:

LEACHATE MONITOR CONTAINED HIGH CONCENTRATIONS OF ACETONE AND MEK.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

NO DEFINED GROUNDWATER TABLE TO AT LEAST 120 FEET BELOW GROUND SURFACE AND 40 FEET BELOW THE BASE OF THE FILL. GROUNDWATER MONITORING WELLS WERE DRY TO FULL DEPTH; THEREFORE, NO GROUNDWATER SAMPLES HAVE BEEN COLLECTED.

SOLID WASTE ASSESSMENT TEST (SWAT) REPORT SUMMARY

GENERAL DATA

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
NUMBER OF BACKGROUND SAMPLE LOCATIONS:	1	2	0
NUMBER OF DOWN-GRADIENT SAMPLE LOCATIONS:	2	4	0
TOTAL SAMPLE LOCATIONS:	3	6	0
NUMBER OF SAMPLING EVENTS:	6	96	0
BLANK = UNDETERMINED			

FINDINGS REGARDING WATER CODE SUBSECTIONS 13273(d) & (e)

=====

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
MONITORING NETWORK FOUND ADEQUATE:	Y	Y	W
DOES THE SITE LEAK?	N	Y	U
HAZARDOUS WASTE:	N	N	U
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	N	Y	N
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

Cleanup pursuant to closure plan; continued monitoring.
Resubmitting revised closure plan by Nov. 88; site to be closed by
1991-92.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:
Lots of petroleum wastes.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES
MAY HAVE ON THE WATERS OF THE STATE:

Effects of low level concentrations of hazardous constituents in the
ground water are not known.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

Vine Hill is a Class I hazardous waste facility. Monitoring for SWAT
purposes is included in RCRA monitoring system. Closure is to be under
RCRA.

SOLID WASTE ASSESSMENT TEST (SWAT) REPORT SUMMARY

GENERAL DATA

=====
 SITE NAME: RICHMOND SANITARY SERVICE-WEST CONTRA COSTA LANDFILL RANK: 1
 REGION: 2 INITIALS OF REGIONAL BOARD CONTACT: BRL

FINDINGS REGARDING WATER CODE SUBSECTIONS 13273(d) & (e)

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
MONITORING NETWORK FOUND ADEQUATE:	Y	Y	W
DOES THE SITE LEAK?	Y	Y	U
HAZARDOUS WASTE:	N	N	U
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	Y	Y	N
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

THEY ARE DEFINING EXTENT OF CONTAMINATION AND PROPOSING CORRECTIVE ACTION PLAN BY AUGUST 31, 1988. (Plan received Sept. 1, 1988)

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:
 THE LANDFILL WAS CLASSIFIED AS A II-1 LANDFILL AND THERE IS A CLASS I LANDFILL ON SITE. Reclassified as Class II landfill by Board Order #88-109.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES

MAY HAVE ON THE WATERS OF THE STATE:

Waste constituents may have migrated beyond perimeter of landfill into adjacent marsh.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

9/1/88 report is an investigation of extent of ground water contamination.

SOLID WASTE ASSESSMENT TEST (SWAT) REPORT SUMMARY

GENERAL DATA

SITE NAME: STAUFFER CHEMICAL-MARTINEZ

"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

Cleanup & Abatement Order # 88-080 issued, 5/18/88.

Cease and desist order will be considered by Board on 12/21/88.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:

High metals, very low pH.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES

MAY HAVE ON THE WATERS OF THE STATE:

Unknown - under investigation.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

No data submitted under SWAT Program.

Stauffer presently in last stage of site characterization, and investigation to determine location and extent of cinder and slag deposits.

Monitoring wells being installed to determine possible existence of migration pathways and presence of contaminants.

Remedial measures to be determined after report submittal on 3/31/89.

SOLID WASTE ASSESSMENT TEST (SWAT) REPORT SUMMARY

NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	N	Y	N
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

Continued close monitoring.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES

MAY HAVE ON THE WATERS OF THE STATE:

Unknown--possible migration of waste into San Francisco Bay.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

Site is in tidal area; no vadose zone.

Started operation in 1920's.

SOLID WASTE ASSESSMENT TEST (SWAT) REPORT SUMMARY

GENERAL DATA

SITE NAME: JONES-HAMILTON

RANK: 1

REGION: 2 INITIALS OF REGIONAL BOARD CONTACT: LHG

DATE REPORT RECEIVED BY REGIONAL BOARD: 07/01/87

DATE REPORT APPROVED BY REGIONAL BOARD: 02/19/88

REPORT STATUS: APPROVED

DATA SUBMITTED

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
NUMBER OF BACKGROUND SAMPLE LOCATIONS:	1	5	0
NUMBER OF DOWN-GRADIENT SAMPLE LOCATIONS:	2	12	0
TOTAL SAMPLE LOCATIONS:	3	17	0
NUMBER OF SAMPLING EVENTS:	12	68	0
BLANK = UNDETERMINED			

FINDINGS REGARDING WATER CODE SUBSECTIONS 13273(d) & (e)

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
MONITORING NETWORK FOUND ADEQUATE:	Y	Y	W
DOES THE SITE LEAK?	N	Y	U
HAZARDOUS WASTE:	N	N	U
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	N	Y	N

"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

Board order (Cleanup & Abatement Order #36-015) requiring cleanup.

Intend to build slurry wall around waste management unit and pump contaminated water out for treatment.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:
DCA, Dioxin, furan, PCP

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES

MAY HAVE ON THE WATERS OF THE STATE:

Probable migration of wastes into the bay from groundwater.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

No SWAT Report submitted--only HAR of which SWAT is part.

Discharger constructed slurry wall around ponds (2) and is presently closing and capping ponds. Site also is contaminated with various compounds derived from adjacent sites (chemical companies) and proposal for joint cleanup is in progress.

SOLID WASTE ASSESSMENT TEST (SWAT) REPORT SUMMARY

GENERAL DATA

SITE NAME: IT CORPORATION-PANOCHÉ

RANK: 1

DATA SUBMITTED

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
NUMBER OF BACKGROUND SAMPLE LOCATIONS:	6	3	0
NUMBER OF DOWN-GRADIENT SAMPLE LOCATIONS:	20	48	0
TOTAL SAMPLE LOCATIONS:	26	51	0
NUMBER OF SAMPLING EVENTS:	104	816	0
BLANK = UNDETERMINED			

FINDINGS REGARDING WATER CODE SUBSECTIONS 13273(d) & (e)

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
MONITORING NETWORK FOUND ADEQUATE:	Y	Y	W
DOES THE SITE LEAK?	Y	Y	U
HAZARDOUS WASTE:	N	N	U
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	Y	Y	N
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

Containment as part of RCRA closure, and continued post-closure monitoring.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES
MAY HAVE ON THE WATERS OF THE STATE:

Hazardous waste constituents have not been detected beyond limits of facility. Limited concentrations of chlorides have been detected beyond the facility boundary.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

Extensive site investigations have been performed in response to 1986 Clean-up & Abatement Order No. 86-013 by RWQCB. Site is closing under RCRA requirements. Intesive efforts by RWQCB, DHS, and EPA are ongoing to achieve environmentally effictive closure and post-closure maintenance.

Submittal of specific SWAT document not required as extensive submittals in response to State and Federal requirements provide equivalency to SWAT requirements.

NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	Y	Y	Y
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

Install additional monitoring wells to further define geology and vertical/horizontal extent of contamination. Implement corrective action program.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:

Car crushing operation previously conducted at site may have contributed hazardous materials to fill area.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES
MAY HAVE ON THE WATERS OF THE STATE:

Some localized contamination noted; other existing or potential effects to be determined.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

SOLID WASTE ASSESSMENT TEST (SWAT) REPORT SUMMARY

GENERAL DATA

SITE NAME: JOHN SMITH LANDFILL

RANK: 1

REGION: 3

INITIALS OF REGIONAL BOARD CONTACT: BH

DATE REPORT RECEIVED BY REGIONAL BOARD: 07/01/87

DATE REPORT APPROVED BY REGIONAL BOARD: 01/11/88

REPORT STATUS: APPROVED

DATA SUBMITTED

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
NUMBER OF BACKGROUND SAMPLE LOCATIONS:	0	6	0
NUMBER OF DOWN-GRADIENT SAMPLE LOCATIONS:	0	5	0
TOTAL SAMPLE LOCATIONS:	0	11	0
NUMBER OF SAMPLING EVENTS:	0	11	0
BLANK = UNDETERMINED			

FINDINGS REGARDING WATER CODE SUBSECTIONS 13273(d) & (e)

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
MONITORING NETWORK FOUND ADEQUATE:	Y	Y	W
DOES THE SITE LEAK?	U	Y	W
HAZARDOUS WASTE:	N	N	W
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	N	Y	N
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

Regional Board issued Clean-up or Abatement Order in February 1988 to define lateral and vertical extent of contamination. Follow-up report submitted to Board in August 1988 was not conclusive. Additional work is on-going to define contaminant and propose corrective measures.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:
Conclusive evidence exists that hazardous wastes were disposed of in the site.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES
MAY HAVE ON THE WATERS OF THE STATE:

Actions are currently under way to characterize the contaminant plume or plumes, identify source(s), design and install remediation system.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

SOLID WASTE ASSESSMENT TEST (SWAT) REPORT SUMMARY

GENERAL DATA

SITE NAME: CASMALIA RESOURCES DISPOSAL SITE

RANK: 1

REGION: 3

INITIALS OF REGIONAL BOARD CONTACT: BH

DATE REPORT RECEIVED BY REGIONAL BOARD: 07/01/87

DATE REPORT APPROVED BY REGIONAL BOARD: 02/12/88

REPORT STATUS: APPROVED

DATA SUBMITTED

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
NUMBER OF BACKGROUND SAMPLE LOCATIONS:	17	15	3
NUMBER OF DOWN-GRADIENT SAMPLE LOCATIONS:	3	20	10
TOTAL SAMPLE LOCATIONS:	20	35	13
NUMBER OF SAMPLING EVENTS:	20	35	13
BLANK = UNDETERMINED			

FINDINGS REGARDING WATER CODE SUBSECTIONS 13273(d) & (e)

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
MONITORING NETWORK FOUND ADEQUATE:	W	Y	W
DOES THE SITE LEAK?	U	Y	U
HAZARDOUS WASTE:	U	N	U
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	N	Y	N
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

Regional Board has issued Cleanup or Abatement Orders 88-76 and 88-145. These Orders require the Discharger to define the horizontal and vertical extent of contamination (leakage) and evaluate remedial alternatives.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:

Since this is a Class I facility, hazardous wastes were and are currently being disposed of at the site.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES

MAY HAVE ON THE WATERS OF THE STATE:

Due to the hydrogeology in and around the site it appears at this time that effects of the wastes on waters of the State are minimal. However, on-going investigative work will determine actual and potential effects to waters of the State.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

DOES THE SITE LEAK?	U	N	N
HAZARDOUS WASTE:	U	N	N
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	N	N	N
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

None appropriate at this time.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:

Possible disposal of household hazardous waste.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES

MAY HAVE ON THE WATERS OF THE STATE:

None.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

Existing sources of pollution (UGT's etc.) have adversely affected groundwater underlying this site masking any effects it might be having on the groundwater. This landfill is located in the EPA SanGabriel Valley superfund site and investigations are continuing at surrounding facilities. Cleanup activities will proceed in this area independent of the findings in the SWAT report.

74 CANISTERS OF CALCIUM CYANIDE PLACED IN LANDFILL. HOUSEHOLD
HAZARDOUS WASTES

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES

MAY HAVE ON THE WATERS OF THE STATE:

PCE, TCE, BENZENE, TRANS-1,2-DICHLOROETHENE DETECTED IN DOWNGRADIENT
WELLS IN EXCESS OF DHS ACTION LEVELS.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

NO SIGNIFICANT SURFACE WATER WITHIN 1 MILE.

SOLID WASTE ASSESSMENT TEST (SWAT) REPORT SUMMARY

GENERAL DATA

SITE NAME: REDDING CITY LANDFILL

RANK: 1

REGION: 5R

INITIALS OF REGIONAL BOARD CONTACT: PVW

DATE REPORT RECEIVED BY REGIONAL BOARD: 06/29/87

DATE REPORT APPROVED BY REGIONAL BOARD: 08/27/87

REPORT STATUS: APPROVED

DATA SUBMITTED

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
NUMBER OF BACKGROUND SAMPLE LOCATIONS:	1	2	0
NUMBER OF DOWN-GRADIENT SAMPLE LOCATIONS:	1	6	0
TOTAL SAMPLE LOCATIONS:	2	8	0
NUMBER OF SAMPLING EVENTS:	3	24	0
BLANK = UNDETERMINED			

FINDINGS REGARDING WATER CODE SUBSECTIONS 13273(d) & (e)

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
MONITORING NETWORK FOUND ADEQUATE:	Y	Y	W
DOES THE SITE LEAK?	Y	Y	Y
HAZARDOUS WASTE:	N	N	N
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	N	Y	N
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

Ground water is within the waste pile. Leachate is collected in a LCRS. Discharger is presently drafting plans to reduce the amount of water within the waste pile. Ground water monitoring wells indicate no down gradient contamination at this time.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:

No evidence that hazardous waste was disposed of at this site.

However, leachate contains concentrations of compounds above designated levels to protect ground water. To date, the LCRS appears to be containing the leachate.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES

MAY HAVE ON THE WATERS OF THE STATE:

If the water level in the waste pile cannot be reduced, there may exist a potential for ground water contamination. The revise waste discharge requirements address this issue.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

HAZARDOUS WASTE:	N	N	N
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	N	Y	N
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

The discharger has installed a ground water interception barrier keyed into bedrock at the toe of the landfill. All contaminated ground water is being intercepted by the barrier and pumped to an evaporation pond.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:

Some hazardous wastes were accepted at a new closed Class II-1 area (mostly heavy metal contaminants).

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES MAY HAVE ON THE WATERS OF THE STATE:

There is now low levels of VOC's in the ground water beneath the site. The II-1 area is encased in a capsule of clay and is not expected to leach heavy metals.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

Waste Discharge Requirements have been revised to increase monitoring.

A cut off wall has been constructed to prevent ground water migration off site.

DOES THE SITE LEAK?	U	Y	U
HAZARDOUS WASTE:	U	N	U
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	N	Y	N
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

Offsite monitoring wells will be sampled to determine extent of contamination. Remedial Action Plan will be done as part of Remedial Action Order issued by DHS.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

===== EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:
Waste oil, organic residues, acid, pigment and salt solutions were disposed when IT Corp. operated a Class II-1 facility on site.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES MAY HAVE ON THE WATERS OF THE STATE:

Offsite monitoring wells have been sampled, and contaminants are migrating offsite. On going studies to define the extent of groundwater pollution will be conducted, under the direction of the California Department of Health Services, Remedial Action Order issued 25 September 1987, Docket No. 87188-012. Private wells offsite were tested and found to be free of contamination.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

GBF LANDFILL-CONTRA COSTA WASTE SERVICE

PAGE 2

ADDITIONAL COMMENTS (IF NECESSARY)

* Sampling program was established for surface water (Markley Creek), however there was no flow and therefore no samples obtained of surface water.

** Unsaturated zone monitoring was waived because ground water contamination already confirmed and it may be unsafe to drill through the site due to buried drums, munitions and other 'hazardous wastes'.

*** Additional up-gradient monitoring wells are constructed to provide background information.

HAZARDOUS WASTE:	U	N	N
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS: N		N	Y
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

SWAT Report appears to satisfy the requirements of Section 13273. Report indicates chloride leachate from site. Ground water monitoring well will be sampled quarterly and the concentration of the chloride plotted against time until the results indicate a trend. No surface water sampling was conducted. Nearest surface water source, which is a supply canal, is more than 1/2 mile from the site.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:
 The site is classified as class II facility. Designated waste (geothermal brines) was disposed of at this facility. The landfill is closed with a final cover.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES
 MAY HAVE ON THE WATERS OF THE STATE:

Potential effects on ground water may be elevated chloride concentration.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

SOLID WASTE ASSESSMENT TEST (SWAT) REPORT SUMMARY

GENERAL DATA

SITE NAME: SAN BERNARDINO COUNTY-BIG BEAR LANDFILL

RANK: 1

REGION: 7

INITIALS OF REGIONAL BOARD CONTACT: AA

DATE REPORT RECEIVED BY REGIONAL BOARD: 12/30/87

DATE REPORT APPROVED BY REGIONAL BOARD: 08/22/88

REPORT STATUS: APPROVED

DATA SUBMITTED

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
NUMBER OF BACKGROUND SAMPLE LOCATIONS:	0	2	0
NUMBER OF DOWN-GRADIENT SAMPLE LOCATIONS:	0	3	0

NUMBER OF SAMPLING EVENTS:	0	10	0
BLANK = UNDETERMINED			

FINDINGS REGARDING WATER CODE SUBSECTIONS 13273(d) & (e)

	SURFACE WATER	GROUND WATER	UNSATURATED ZONE
MONITORING NETWORK FOUND ADEQUATE:	W	Y	W
DOES THE SITE LEAK?	U	N	U
HAZARDOUS WASTE:	U	N	U
NON-HAZARDOUS WASTE ABOVE BACKGROUND LEVELS:	N	N	N
"Y" = YES; "N" = NO; "U" = UNDETERMINED; "W" = WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

The SWAT Report indicates that the site may have leaked small amounts of leachate to the ground water. Analyses of ground water samples show anomalous concentrations of three inorganic, three organic, and seven metal contaminants. The discharger was requested to submit the data from the replicate sampling of all the ground water monitoring wells by 9/1/88. Verification Report indicates that the site is not leaking contaminants to the ground water. No surface water or vadose zone sampling was conducted due to the absence of both.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:
 Based on the results of the verification sampling the necessity to establish a corrective action program will be assessed by Regional Board staff in accordance with Sub.15. The verification sampling report was received on 8/1/88. The report indicates that the site is not leaking contaminants to the ground water. Continuous monitoring will be performed through compliance with existing Monitoring and Reporting Program No.88-068.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES
 MAY HAVE ON THE WATERS OF THE STATE:
 SEE ABOVE COMMENT.

"Y" = YES; "N" = NO; "U" = UNDETERMINED; "WAIVED"			

ACTIONS PROPOSED TO ADDRESS LEAKAGE PROBLEMS:

Dozens of ground water monitoring wells have been constructed downgradient from this site over the last 6-7 years. A plume of ground water contaminated with solvents and heavy metals has been identified. Measures to further define the contaminant plume and to clean up contaminated ground water are under way.

FINDINGS REGARDING GOVERNMENT CODE SECTION 66796.54 (a)

EVIDENCE REGARDING EXTENT OF HAZARDOUS WASTE DISPOSED OF IN THE SITE:

Site was used as a regulated hazardous waste site from 1956 to 1975. During that period, approximately 36 million gallons of industrial wastes, including solvents and acidic, metal laden solutions, were disposed of there.

EVIDENCE OF POTENTIAL EFFECTS THESE WASTES MAY HAVE ON THE WATERS OF THE STATE:

Subsurface leakage from the site has affected beneficially used ground water downgradient from the site.

ARE EXISTING DRINKING WATER WELLS IMPACTED? N

ADDITIONAL COMMENTS (IF NECESSARY)

Mitigation and cleanup measures, including removal and treatment of contaminated ground water, are being managed by DoHS.

Discharge to site ceased on 1/86. 1985 HAR indicates leakage of fluoride to saline aquifer under Queen Dry Lake has occurred in the past. Closure WDR's are proposed to ensure no additional leakage. Site is being handled under Subchapter 15 and TCCA. Regional Board to require that extent of fluoride migration be defined.

THE NAVAL FACILITY ENGINEERING COMMAND SUBMITTED THE NAVY ASSESSMENT
AND CONTROL OF INSTALLATION POLLUTANTS (MACIP) PLAN TO SATISFY THE
STATUTORY REQUIREMENTS OF SHAT PROGRAM. LETTER SENT TO USCG ON
04/10/87 WHICH DETAILED DEFICIENCIES IN MACIP PLAN. MEETING WITH
USCG AND NAVAL ENGINEERING COMMAND STAFF ON 05/18/87 CONCLUDED THAT
THE FINAL MACIP REPORT WILL SATISFY ALL REQUIREMENTS OF SHAT
PROGRAM.

<p>* SITE REPORT APPEARS TO SATISFY THE REQUIREMENTS OF SECTION 13273. REPORT INDICATES CHLORIDE LEACHATE FROM SITE. GROUND WATER MONITORING WELLS WILL BE ANALYZED QUARTERLY FOR CHLORIDE, AND THE CONCENTRATION PLOTTED AGAINST THEIR TARGET UNTIL THE RESULTS INCPTE A TRND.</p> <p>** Report was sent to operator on 07/15/87 for failure to meet Report due date. Report was received on 07/18/88. Report indicates that hazardous constituents were detected in groundwater. Notification will be sent to the DHS/SMB if necessary at the completion of the confirmation tests. Waste discharge requirements were updated to comply with requirements of Subchapter 15 on May 12, 88. Replicate sampling results of verification monitoring are due 8/1/88. Verification results indicate groundwater contamination. Discharger was requested to determine source of contaminants (i.e. seepage ponds, landfill, or off-site).</p> <p>** SITE REPORT APPEARS TO SATISFY THE REQUIREMENTS OF SECTION 13273. REPORT INDICATES CHLORIDE LEACHATE FROM SITE. GROUND WATER MONITORING WELLS WILL BE ANALYZED QUARTERLY FOR CHLORIDE, AND THE CONCENTRATION PLOTTED AGAINST THEIR TARGET UNTIL THE RESULTS INCPTE A TRND.</p> <p>** Report was sent to operator on 07/15/87 for failure to meet Report due date. Report was received on 12/30/87. Report indicates that hazardous constituents were detected in groundwater. Notification will be sent to the DHS/SMB if necessary at the completion of the confirmation tests. Waste discharge requirements were updated to comply with requirements of Subchapter 15 on May 12, 88. Quarterly sampling results of verification monitoring are due 8/1/88. Verification monitoring report indicates that the site is not leaking contaminants to the ground water. Continuous monitoring will be performed through compliance with the existing Monitoring and Reporting Program Order No. 88-088.</p> <p>** DRAFT COPY OF THE VERIFICATION REPORT OF THE NAVY ASSESSMENT AND CONTROL OF INSTALLATION POLLUTANTS (NACIP) PLAN WAS RECEIVED ON 01/08/88. Verification Report is inadequate to satisfy the requirements of Section 13273. A meeting with the discharger was held on April 18, 88. It was agreed that in order to satisfy the basic requirements of Section 13273 in the most expeditious manner, the discharger has to submit the results of testing that would reliably indicate the effects of the landfill on the groundwater. The testing would include drilling at an angle beneath the wastes and obtaining soil samples. Groundwater samples will be collected from sampling holes drilled adjacent to the landfill. A workplan for completing the SMAT report was approved on July 1, 1988. Revised SMAT report is due October 1, 1988.</p>

APPENDIX III

DISCUSSION OF TERMS AND DEFINITIONS

Hazardous Waste

For the purpose of this program, hazardous waste is defined as any waste which meets either the definition of hazardous waste in the Health & Safety Code Section 25117 or is hazardous pursuant to any criterion in Title 22, Article 11 of the California code of Regulations.

Article 11 contains two short lists of substances listing concentration levels above which a substance would be considered hazardous waste. If monitoring data reveals that any of the listed substances is present above the listed concentration, then the site is leaking hazardous waste. Article 11 also lists several criteria for determining whether a substance is hazardous, for example, toxicity, flammability, or corrosivity. If tests indicate a substance meets any of these criteria, it would be considered a hazardous waste.

State Board staff realized that many sites are leaking wastes but not necessarily at concentrations which classify the waste as a hazardous waste. As a result, State Board staff created a second leak category to classify sites that are not leaking at hazardous wastes concentrations:

Non-hazardous substances with concentrations above background levels.

If monitoring data reveals the presence of any substances with concentration which are above background levels and are considered a possible threat to ground water quality, yet have concentrations which are below hazardous waste levels, the leak type falls into this classification. Constituents in this category would include (but not be limited to) all substances listed in Article 9, Title 22 of the Health & Safety Code. Substances which are found in concentrations above background levels, but for which there are no established water quality criteria, are also be included in this category.

ARTICLE 4. ADMINISTRATIVE ENFORCEMENT AND REMEDIES AVAILABLE TO AN ENFORCEMENT AGENCY**Section**

66796.53. Enforcement order or action; explanatory and justifying statement to other agencies; time; inspection of site; receipt of complaint by wrong agency; reference to proper agency; action by agency or written explanation required.

66796.54. Reports to the legislature; extent of hazardous wastes; potential effects on water quality; accuracy of tests.

§ 66796.52. Emergency cease and desist or clean up orders; nuisance abatement

(a) Whenever an enforcement agency finds that any person is operating a solid waste facility or proposes to operate such a facility which causes or threatens to cause a condition of hazard, pollution, or nuisance *** constituting an emergency requiring immediate action to protect the public health, welfare, or safety, the enforcement agency may issue a cease and desist or cleanup order under this section. If the enforcement agency fails to issue the order, the board may, after notification of the enforcement agency, do so.

(b) An enforcement agency may, whenever it determines that the operation of a solid waste landfill, as defined in subdivision (h) of Section 66799.3, is causing or threatening to cause a condition of hazard, pollution, or nuisance due to the migration of methane gas or any solid or hazardous waste, require the owner or operator of the facility to take corrective action as necessary to abate a nuisance or protect human health and the environment.

(Amended by Stats.1987, c. 1319, § 3, eff. Sept. 28, 1987.)

§ 66796.53. Enforcement order or action; explanatory and justifying statement to other agencies; time; inspection of site; receipt of complaint by wrong agency; reference to proper agency; action by agency or written explanation required

(a) At least 10 days before issuing an enforcement order which is not for an emergency, within 5 days after issuing an enforcement order for an emergency, and within 15 days after discovering a violation of a state law, regulation, or permit, or a local ordinance, rule, regulation, license, or permit, for a solid waste disposal site which is likely to result in an enforcement action, the following agencies shall provide a written statement providing an explanation of, and justification for, the enforcement order or a description of the violation in the following manner:

(1) The enforcement agency shall provide the statement to the local California regional water quality control board, the local air pollution control district or air quality management district, and the State Department of Health Services.

(2) A California regional water quality control board shall provide the statement to the enforcement agency, the local air pollution control district or air quality management district, and the State Department of Health Services.

(3) An air pollution control district or an air quality management district shall provide the statement to the enforcement agency, the California regional water quality control board, and the State Department of Health Services.

(4) The State Department of Health Services shall provide the statement to the enforcement agency, the local California regional water quality control board, and the local air pollution control district or air quality management district.

(b) Within 10 days after receiving a notice of the issuance of, or the proposal to issue, an enforcement order, pursuant to subdivision (a), the local California regional water quality control board, the enforcement agency, the local air pollution control district or the air quality management

Asterisks *** indicate deletions by amendment

§ 66796.53

GOVERNMENT CODE

district, and the State Department of Health Services shall inspect the solid waste disposal site to determine whether any state law, regulation, or permit, which that board or agency is authorized to enforce, is being violated.

(c) If any board or agency specified in subdivision (a) receives a complaint concerning a solid waste disposal site and the board or agency determines that it is not authorized to take action concerning the complaint, the board or agency shall refer the complaint within 10 days of receipt to another state agency which it determines is authorized to take action.

(d) If any agency or board specified in subdivision (a) receives a complaint concerning a solid waste disposal site which the agency or board does not refer to another state agency pursuant to subdivision (c), or if such an agency or board receives a complaint referred to it by another agency or board pursuant to subdivision (c), the agency or board shall either take enforcement action concerning that facility or provide the person who filed the complaint with a written statement within 10 days explaining why an enforcement action would not be appropriate.

(Added by Stats.1984, c. 1532, § 1.)

C.J.S. Health and Environment §§ 91, 92 to 106, 129 to 131.

§ 66796.54. Reports to the legislature; extent of hazardous wastes; potential effects on water quality; accuracy of tests

(a) On or before January 1, 1989, January 1, 1990, and January 1, 1991, the State Water Resources Control Board shall submit a report to the Legislature summarizing the extent of hazardous waste in solid waste disposal sites and the potential effects these hazardous wastes may have upon the quality of waters of the state, and recommending actions needed to protect the quality of water. Each report shall summarize the data from those solid waste water quality assessment test reports which have been submitted during the preceding year to California regional water quality control boards pursuant to Section 13273 of the Water Code, and shall evaluate the accuracy of the solid waste water quality assessment tests conducted.

(b) On or before July 1, 1988, and July 1, 1989, the State Air Resources Board shall submit a report to the Legislature summarizing the extent of hazardous waste in solid waste disposal sites and the potential effects these hazardous wastes may have upon the ambient air quality of the state, and recommending actions needed to protect the quality of air. The reports submitted on July 1, 1988, and July 1, 1989, shall summarize the data from the solid waste air quality assessment test reports submitted to air quality maintenance districts and air pollution control districts on or before July 1, 1987, and January 1, 1988, respectively, pursuant to Section 41805.5 of the Health and Safety Code, and shall evaluate the accuracy of the solid waste assessment tests conducted.

(Added by Stats.1986, c. 1055, § 2, eff. Sept. 24, 1986; Stats.1986, c. 1055, § 3, eff. Sept. 24, 1986, operative Jan. 1, 1987.)

1986 Legislation

Amendment of this section by § 2 of Stats.1986, c. 971, failed to become operative under the provisions of § 4 of that Act.

Section 6 of Stats.1986, c. 1055, eff. Sept. 24, 1986, provides:

"Section 3 of this bill incorporates changes to Section 66796.54 of the Government Code proposed by both this bill and AB 3088 [Stats.1986, c. 971]. It shall only become operative if (1) both bills are enacted and become effective on or before January 1, 1987, but this bill becomes operative first, (2) this bill repeals and adds Section 66796.54 of the Government Code and AB 3088 amends Section 66796.54 of the Government Code, and (3) this bill is enacted after AB 3088, in which case Section 66796.54 of the Government Code, as added by Section 2 of this bill, shall remain

operative only until the operative date of AB 3088, at which time Section 3 of this bill shall become operative."

Former § 66796.54, which pertained to reports to the legislature concerning the extent of hazardous wastes, and their potential effects on air and water quality, and which was added by Stats.1984, c. 1532, § 2, amended by Stats.1986, c. 971, § 1, and was repealed by Stats.1986, c. 1055, § 1.

Derivation: Former § 66796.54, added by Stats.1984, c. 1532, § 2, amended by Stats.1986, c. 971, § 1.

Health and Environment 25.7(23).

C.J.S. Health and Environment §§ 113, 150.

§ 13273. Solid waste disposal sites; ranking based on threat to water quality; submission of water quality assessment test reports by rank; waiver; evaluation; procedure upon discovery of inadequate monitoring or contamination of the water; revision of discharge requirements

(a) The state board shall, on or before January 1, 1986, rank all solid waste disposal sites, as defined in Section 66714.1 of the Government Code, based upon the threat which they may pose to water quality. On or before July 1, 1987, the operators of the first 150 solid waste disposal sites ranked on the list shall submit a solid waste water quality assessment test to the appropriate regional board for its examination pursuant to subdivision (d). On or before July 1 of each succeeding year, the operators of the next 150 solid waste disposal sites ranked on the list shall submit a solid waste water quality assessment test to the appropriate regional board for its examination pursuant to subdivision (d).

(b) Before a solid waste water quality assessment test report may be submitted to the regional board, a registered geologist, registered pursuant to Section 7850 of the Business and Professions Code, a certified engineering geologist, certified pursuant to Section 7842 of the Business and Professions Code, or a civil engineer registered pursuant to Section 6762 of the Business and Professions Code, who has at least five years' experience in groundwater hydrology, shall certify that the report contains all of the following information and any other information which the state board may, by regulation, require:

(1) An analysis of the surface and groundwater on, under, and within one mile of the solid waste disposal site to provide a reliable indication whether there is any leakage of hazardous waste.

(2) A chemical characterization of the soil-pore liquid in those areas which are likely to be affected if the solid waste disposal site is leaking, as compared to geologically similar areas near the solid waste disposal site which have not been affected by leakage or waste discharge.

(c) If the regional board determines that the information specified in paragraph (1) or (2) is not needed because other information demonstrates that hazardous wastes are migrating into the water, the regional board may waive the requirement to submit this information specified in paragraphs (1) and (2) of subdivision (b). The regional board shall also notify the State Department of Health Services, and shall take appropriate remedial action pursuant to Chapter 5 (commencing with Section 13300).

(d) The regional board shall examine the report submitted pursuant to subdivision (b) and determine whether the number, location, and design of the wells and the soiling testing could detect any leachate buildup, leachate migration, or hazardous waste migration. If the regional board determines that the monitoring program could detect the leachate and hazardous waste, the regional board shall take the action specified in subdivision (e). If the regional board determines that the monitoring program was inadequate, the regional board shall require the solid waste disposal site to correct the monitoring program and resubmit the solid waste assessment test based upon the results from the corrected monitoring program.

(e) The regional board shall examine the approved solid waste assessment test report and determine whether any hazardous waste migrated into the water. If the regional board determines that hazardous waste has migrated into the water, it shall notify the State Department of Health Services and the California Waste Management Board and shall take appropriate remedial action pursuant to Chapter 5 (commencing with Section 13300).

(f) When a regional board revises the waste discharge requirements for a solid waste disposal site, the regional board shall consider the information provided in the solid waste assessment test report and any other relevant site-specific engineering data provided by the site operator for that solid waste disposal site as part of a report of waste discharge.

(Added by Stats.1984, c. 1532, § 6. Amended by Stats.1986, c. 971, § 3.)

§ 13273.1. Solid waste assessment questionnaires

(a) Except as provided in subdivision (b), an operator of a solid waste disposal site may submit a solid waste assessment questionnaire to the appropriate regional board at least 24 months prior to the site's solid waste water quality assessment test due date as established pursuant to Section 13273. The regional board shall require the operator to submit any additional information, as needed, or require onsite verification of the solid waste assessment questionnaire data in order to render a decision pursuant to subdivision (c).

(b) Any solid waste disposal site which is larger than 50,000 cubic yards or is known or suspected to contain hazardous substances, other than household hazardous wastes, shall be prohibited from submitting a solid waste assessment questionnaire under this section.

(c) The regional board shall complete a thorough analysis of each solid waste assessment questionnaire submitted pursuant to this section by a date 18 months prior to the solid waste assessment test due date. Based upon this analysis, the regional board shall determine whether or not the site has discharged hazardous substances which will impact the beneficial uses of water. If the regional board determines that the site has not so discharged hazardous substances, the regional board shall notify the operator that the operator is not required to prepare a solid waste water quality assessment test pursuant to Section 13273.

(d) If the regional board does not make the determination specified in subdivision (c), the operator shall submit all, or a portion of, a solid waste water quality assessment test. The regional board shall notify the operator of this determination and indicate if all, or what portion of, a solid waste water quality assessment test shall be required. The operator shall submit the solid waste water quality assessment test, or a portion thereof, by the date established pursuant to Section 13273.

(e) The state board shall develop a solid waste assessment questionnaire and guidelines for submittal no later than three months after the effective date of this statute adding this section. The questionnaire shall contain, but not be limited to, a characterization of the wastes, size of the site, age of the site, and other appropriate factors.

(f) Those operators of solid waste disposal sites listed by the state board pursuant to Section 13273 in Rank 3 and seeking an exemption under this section shall submit their solid waste assessment questionnaire no later than July 1, 1988. If the regional board does not make the determination specified in subdivision (c), the regional board shall require the operator to submit all, or a portion of, a solid waste water quality assessment test by July 1, 1990.

(Added by Stats.1987, c. 932, § 2, eff. Sept. 22, 1987.)

§ 13273.2. Reevaluation of solid waste disposal site status; requirement to submit or revise solid waste water quality assessment test

Notwithstanding subdivision (b) of Section 13273.1, a regional board may reevaluate the status of any solid waste disposal site ranked pursuant to Section 13273, including those sites exempted pursuant to Section 13273.1, and may require the operator to submit or revise a solid waste water quality assessment test after July 1, 1989. The regional board shall give written notification to the operator that a solid waste assessment test is required and the due date. This section shall not require submittal of a solid waste water quality assessment test by a date earlier than established in accordance with Section 13273.

(Added by Stats.1987, c. 932, § 3, eff. Sept. 22, 1987.)

§ 13273.3. Operator defined

As used in Sections 13273, 13273.1, and 13273.2, "operator" means a person who operates or manages, or who has operated or managed, the solid waste disposal site. If the operator of the solid waste disposal site no longer exists, or is unable, as determined by the regional board, to comply with the requirements of Section 13273, 13273.1, or 13273.2, "operator" means any person who owns or who has owned the solid waste disposal site.

(Added by Stats.1987, c. 932, § 4, eff. Sept. 22, 1987.)

§ 41805.5

HEALTH AND SAFETY CODE

ARTICLE 2. NONAGRICULTURAL BURNING

Section

41805.5. Solid waste air quality assessment test report; contents; questionnaires; exemptions.

§ 41805.5. Solid waste air quality assessment test report; contents; questionnaires; exemptions

(a) Except as provided in subdivisions (b) and (c), the operator of a solid waste disposal site shall submit to the district on or before July 1, 1987, a solid waste air quality assessment test report that contains all of the following:

(1) Test results to determine if there is any underground landfill gas migration beyond the solid waste disposal site's perimeter.

(2) Analyses for specified air contaminants in the ambient air adjacent to the solid waste disposal site to determine the effect of the site on air quality.

(3) Chemical characterization test results to determine the composition of gas streams immediately above the solid waste disposal site, or immediately above the solid waste disposal site and within the solid waste disposal site, as appropriate, as determined by the district.

(4) Any other information which the district board may require, by emergency regulation.

The solid waste air quality assessment test report shall be prepared in accordance with the guidelines developed by the state board pursuant to subdivision (d).

(b) The operator of an inactive solid waste disposal site shall complete and submit the screening questionnaire, developed pursuant to subdivision (e), to the district on or before November 1, 1986, unless the operator is required to submit a report containing the same information specified in subdivision (a) pursuant to a federal, state, or district order, or unless exempted pursuant to subdivision (c). The district shall evaluate the submitted screening questionnaires in accordance with the guidelines developed pursuant to subdivision (e) and shall determine whether the operator of the site be required to submit all, or a portion of, the information required to be reported in a solid waste air quality assessment test report. The district shall notify the operator in writing on or before January 1, 1987, of the information identified in subdivision (a) to be submitted for the site. After receiving this notification, the operator of the inactive solid waste disposal site shall submit a solid waste air quality assessment test report containing the required information on or before January 1, 1988, to the district.

(c) A district may exempt from subdivisions (a) and (b) a solid waste disposal site or inactive solid waste disposal site which has accepted or now contains only inert and nondecomposable solids. To receive an exemption, the operator of the site shall submit, on or before November 1, 1986, a copy of all permits, all waste discharge requirements pertinent to the site, and any other data necessary for the district to determine whether an exemption should be granted to the site.

(d) On or before February 1, 1987, the state board, in coordination with the districts, shall develop and publish test guidelines for the solid waste air quality assessment report specifying the air contaminants to be tested for and identifying acceptable testing, analytical, and reporting methods to be employed in completing the report.

(e) On or before October 1, 1986, the state board, in coordination with the districts, shall develop and publish a screening questionnaire for inactive solid waste disposal sites and guidelines for evaluating the questionnaire by the districts pursuant to subdivision (b). The screening questionnaire and guidelines shall require an inactive solid waste disposal site to be evaluated based on the nature and age of materials in the site, the quantity of materials in the site, the size of the site, and other appropriate factors. The guidelines for evaluating the screening questionnaire shall require a district to weigh heavily the proximity of the site to residences, schools, and other sensitive areas, and to pay particular attention to potential adverse impacts on facilities such as hospitals and schools, and on residential areas, within one mile of the site's perimeter.

(f) A district may reevaluate the status of a solid waste disposal site, including sites exempted pursuant to subdivision (c), and require the operator to submit or revise a solid waste air quality assessment test report after January 1, 1987. The district shall give written notification to the operator of the solid waste disposal site that a solid waste air quality assessment test report is to be submitted, or that the existing report is to be revised, and the date by which the report is to be submitted.

Underline indicates changes or additions by amendment

(g) A district shall evaluate any solid waste air quality assessment test reports submitted pursuant to subdivisions (a), (b), and (f), and determine if the report's testing, analytical and reporting methods comply with the guidelines developed pursuant to subdivision (d). If the district determines that the solid waste air quality assessment test report complies with the guidelines, it shall evaluate the data. If the district determines, after evaluation of the report and consultation with the state department and the California Waste Management Board, that levels of one or more specified air contaminants pose a health risk to human beings or a threat to the environment, the district shall take appropriate remedial action.

(h) If a district determines that a solid waste air quality assessment test report does not comply with the guidelines developed pursuant to subdivision (d), the district shall provide the operator of the site with a written notice specifying the inadequacies of the report and shall require the operator to correct the deficiencies and resubmit the report by a date determined by the district.

(i) For the purpose of this section, the following definitions apply:

(1) "Inactive solid waste disposal site" means a solid waste disposal site which has not received any solid waste for disposal after January 1, 1984.

(2) "Landfill gas" means any untreated, raw gas derived through a natural process from the decomposition of organic waste deposited in a solid waste disposal site or from the evolution of volatile species in the waste.

(3) "Operator" means the person who operates or manages, or who has operated or managed, the solid waste disposal site. If the operator of the solid waste disposal site no longer exists, or is unable, as determined by the district, to comply with the requirements of this section, "operator" means any person who owns or who has owned the solid waste disposal site.

(4) "Perimeter" means the outer boundary of the entire solid waste disposal site property.

(5) "Solid waste disposal site" means a place, location, tract of land, area, or premises in use, or which has been used, for the landfill disposal of solid waste, as defined in Section 66719 of the Government Code, or hazardous waste, as defined in Section 66714.8 of the Government Code, or both.

(6) "Specified air contaminants" means substances determined to be air contaminants by the state board in coordination with the districts. The state board and the districts shall consider determining the following compounds to be air contaminants for purposes of this paragraph: benzene, chloroethene, 1,2-dibromoethane, 1,2-dichloroethane, benzyl chloride, chlorobenzene, dichlorobenzene, 1,1-dichloroethene, dichloromethane, formaldehyde, hydrogen sulfide, tetrachloroethylene, tetrachloromethane, toluene, 1,1,1-trichloroethane, trichloroethylene, trichloromethane, xylene, and any other substance deemed appropriate by the state board or district.

(Added by Stats.1986, c. 1055, § 5, urgency, eff. Sept. 24, 1986. Amended by Stats.1987, c. 932, § 1, eff. Sept. 22, 1987.)
